VOLUME XX, PART II.

SUBJECT INDEX.

A

Abrasion.
The Standard Deval — Test for Rock. F. H. Jackson, 278. Discussion, 291.

Admixtures.
Effect of Hydrated Lime and Other Powdered — in Concrete. D. A. Abrams, 149. Discussion, 204.

Aggregate.
Impact Test on Concrete to Regulate Coarse and Fine — Qualities and Mixes for Highways. H. S. Mattimore, 266. Discussion, 277.

Alloying.
Molybdenum as an — Element in Structural Steels. G. W. Sargent, 5. Discussion, 29.

Alloys.
Fatigue and Impact Fatigue Tests of Aluminum —. W. A. Gibson, 115. Discussion, 133.

Alternating.
A High-Speed — Torsion Testing Machine. D. J. McAdam, 366. Discussion, 371.

Aluminum.
Fatigue and Impact Fatigue Tests of — Alloys. W. A. Gibson, 115. Discussion, 133.

Apparatus.
An — for Delicate Flexure Tests and Some Results of Such Tests. W. J. Francke, 372. Discussion, 387.

Asphalt.
The So-Called — Content of Road Oils. B. A. Anderton and D. G. Taylor, 314. Discussion, 320.

B

Brasses.
A Note on the Constitution of Certain Tin-Bearing —. William Campbell, 104.

Brinell.
A New Method for Calibrating — Hardness Testing Machines. J. L. Jones and C. H. Marshall, 392. Discussion, 396.

C

Cable.
Chain — and Some of its Physical Properties. C. G. Lutts, 80. Discussion, 102.

Calibrating.
A New Method for — Brinell Hardness Testing Machines. J. L. Jones and C. H. Marshall, 392. Discussion, 396.
Cast Iron.
Effect of Machining and of Cross-Section on the Tensile Properties of Malleable —. H. A. Schwartz, 70.
Cement.
A New Type of Automatic — Tester. T. Y. Olsen, 408.
Chain.
— Cable and Some of its Physical Properties. C. G. Lutts, 80. Discussion, 102.
Coarse Aggregate.
See **Aggregate.**
Coatings.
A New Method of Testing Galvanized —. Allerton S. Cushman, 411. Discussion, 442.
Cold-Rolling.
A Note on Stresses Caused by —. H. M. Howe and E. C. Groesbeck, 31. Discussion, 38.
Colorimeter.
A New — for White Pigments and Some Results Obtained by Its Use. A. H. Pfund, 440. Discussion, 449.
Concrete—Concretes.
Effect of Hydrated Lime and Other Powdered Admixtures in —. D. A. Abrams, 149. Discussion, 204.
Effect of Rodding —. F. E. Giesecke, 219. Discussion, 231.
Impact Test on — to Regulate Coarse and Fine Aggregate Qualities and Mixes for Highways. H. S. Mattimore, 266. Discussion, 277.
Some Determinations of the Stress-Deformation Relations for — under Repeated and Continuous Loadings. G. M. Williams, 233. Discussion, 250.

D

Deval Abrasion.
See **Abrasion.**
Ductility.
— Testing Machines. T. Y. Olsen, 398. Discussion, 404.

E

Elastic Limit.
Improved — Recorder. C. H. Marshall, 361.
Electric.
Testing of Porosity of — Porcelain. W. D. A. Peaslee, 495.

F

Fatigue.
— and Impact — Tests of Aluminum Alloys. W. A. Gibson, 115. Discussion, 133.

Fine Aggregate.
See **Aggregate.**
Fissures.
On the Shattered Zones in Certain Steel Rails, with Notes on the Interior Origin of Transverse —. J. E. Howard, 44. Discussion, 60.
Flexure.
An Apparatus for Delicate — Tests and Some Results of Such Tests. W. J. Francke, 372. Discussion, 387.

G

Galvanized.
A New Method of Testing — Coatings. Allerton S. Cushman, 411. Discussion, 422.

H

Hardness.
A New Method for Calibrating Brinell — Testing Machines. J. L. Jones and C. H. Marshall, 392. Discussion, 396.
Hiding Power.
An Instrument for Measuring the — of Paints. R. L. Hallett, 426. Discussion, 436.
High-Speed.
A — Alternating Torsion Testing Machine. D. J. McAdam, 366. Discussion, 371.
Highways.
Impact Test on Concrete to Regulate Coarse and Fine Aggregate Qualities and Mixes for —. H. S. Mattimore, 266. Discussion, 277.
Hose.
Construction of Steam —. J. M. Bierer, 355. Discussion, 359.
Hydrated Lime.
See **Lime.**

I

Impact.
Fatigue and — Fatigue Tests of Aluminum Alloys. W. A. Gibson, 115. Discussion, 133.
— Test on Concrete to Regulate Coarse and Fine Aggregate Qualities and Mixes for Highways. H. S. Mattimore, 266. Discussion, 277.
Instrument.
An — For Measuring the Hiding Power of Paints. R. L. Hallett, 426. Discussion, 436.

L

Lime.
Effect of Hydrated — and Other Powdered Admixtures in Concrete. D. A. Abrams, 149. Discussion, 204.

M

Machining.
Effect of — and of Cross-Section on the Tensile Properties of Malleable Cast Iron. H. A. Schwartz, 70.
Malleable.
Effect of Machining and of Cross-Section on the Tensile Properties of — Cast Iron. H. A. Schwartz, 70.
Measuring.
See **Instrument.**
Molybdenum.
— as an Alloying Element in Structural Steels. G. W. Sargent, 5. Discussion, 29.

O

Oils.
The So-Called Asphalt Content of Road —. B. A. Anderton and D. G. Taylor, 314. Discussion, 320.

P

Paints.
An Instrument for Measuring the Hiding Power of —. R. L. Hallett, 426. Discussion, 436.
Petroleum.
Some Relations between the Characteristics of Steam-Distilled — Residuals. B. A. Anderton, 298. Discussion, 312.
Pigments.
A New Colorimeter for White — and Some Results Obtained by Its Use. A. H. Pfund, 440. Discussion, 449.
Plastometer.
Further Development of the — and its Practical Application to Research and Routine Problems. H. Green, 451. Discussion, 483.
Plywood.
The Uses and Properties of Water-resistant —. A. Elmendorf, 324.
Porcelain.
Testing of Porosity of Electric —. W. D. A. Peaslee, 495.
Porosity.
Testing of — of Electric Porcelain. W. D. A. Peaslee, 495.
Powdered.
Effect of Hydrated Lime and Other — Admixtures in Concrete. D. A. Abrams, 149. Discussion, 204.

R

Rails.
On the Shattered Zones in Certain Steel —, with Notes on the Interior Origin of Transverse Fissures. J. E. Howard, 44. Discussion, 60.
Recorder.
Improved Elastic Limit —. C. H. Marshall, 361.

Research.
Further Development of the Plastometer and its Practical Application to — and Routine Problems. H. Green, 451. Discussion, 483.
Residuals.
Some Relations between the Characteristics of Steam-Distilled Petroleum —. B. A. Anderton, 298. Discussion, 312.
Road Oils.
See **Oils.**
Rock.
The Standard Deval Abrasion Test for —. F. H. Jackson, 278. Discussion, 291.
Rodding.
Effect of — Concrete. F. E. Giesecke, 219. Discussion, 231.

S

Sand.
The Volume-Moisture Relation in — and a Method of Determining Surface Area Based Thereon. R. B. Young and W. D. Walcott, 137.
Shattered Zones.
On the — in Certain Steel Rails, with Notes on the Interior Origin of Transverse Fissures. J. E. Howard, 44. Discussion, 60.
Steam Hose.
See **Hose.**
Steam-Distilled Petroleum.
See **Petroleum.**
Steel—Steels.
Molybdenum as an Alloying Element in Structural —. G. W. Sargent, 5. Discussion, 29.
On the Shattered Zones in Certain — Rails, with Notes on the Interior Origin of Transverse Fissures. J. E. Howard, 44. Discussion, 60.
Stresses.
A Note on — Caused by Cold-Rolling. H. M. Howe and E. C. Groesbeck, 31. Discussion, 38.
Stress-Deformation.
Some Determinations of the — Relations for Concretes under Repeated and Continuous Loadings. G. M. Williams, 233. Discussion, 250.
Structural Steels.
See **Steels.**
Surface Area.
The Volume-Moisture Relation in Sand and a Method of Determining — Based Thereon. R. B. Young and W. D. Walcott, 137.

T

Tensile.
Effect of Machining and of Cross-Section on the — Properties of Malleable Cast Iron. H. A. Schwartz, 70.

Test—Tests.
An Apparatus for Delicate Flexure — and Some Results of Such —. W. J. Francke, 372. Discussion, 387.
Fatigue and Impact Fatigue — of Aluminum Alloys. W. A. Gibson, 115. Discussion, 133.
Impact — on Concrete to Regulate Coarse and Fine Aggregate Qualities and Mixes for Highways. H. S. Mattimore, 266. Discussion, 277.
The Standard Deval Abrasion — for Rock. F. H. Jackson, 278. Discussion, 291.
Testing.
A New Method of — Galvanized Coatings. Allerton S. Cushman, 411. Discussion, 422.
— of Porosity of Electric Porcelain. W. D. A. Peaslee, 495.
Testing Machine.
A High-Speed Alternating Torsion —. D. J. McAdam, 366. Discussion, 371.
A New Method for Calibrating Brinell Hardness —. J. L. Jones and C. H. Marshall, 392. Discussion, 396.
Ductility —. T. Y. Olsen, 398. Discussion, 404.
Tester.
A New Type of Automatic Cement —. T. Y. Olsen, 408.
Tin.
A Note on the Constitution of Certain — Bearing Brasses. William Campbell, 104.
Torsion.
A High-Speed Alternating — Testing Machine. D. J. McAdam, 366. Discussion, 371.
Transverse Fissures.
See **Fissures.**

V

Volume-Moisture.
The — Relation in Sand and a Method of Determining Surface Area Based Thereon. R. B. Young and W. D. Walcott, 137.

W

Water-resistant Plywood.
See **Plywood.**

AUTHOR INDEX.

A

Abrams, D. A.
Effect of Hydrated Lime and Other Powdered Admixtures in Concrete, 149.
Discussion, 212, 231, 261.

Anderton, B. A.
Some Relations between the Characteristics of Steam-Distilled Petroleum Residuals, 298.
The So-Called Asphalt Content of Road Oils, 314.
Discussion, 312, 313, 323.

Aston, James.
Discussion, 423.

Aupperle, J. A.
Discussion, 422.

B

Beyer, A. H.
Discussion, 387.

Bierer, J. M.
Construction of Steam Hose, 355.
Discussion, 359, 360.

Bingham, E. C.
Discussion, 486, 492.

Boyd, D. K.
Discussion, 204.

Boylston, H. M.
Discussion, 396.

Burgess, G. K.
Discussion, 422.

C

Campbell, William.
A Note on the Constitution of Certain Tin-Bearing Brasses, 104.

Chamberlin, C. G.
Discussion, 404.

Clark, K. A.
Discussion, 293.

Comstock, G. F.
Discussion, 60, 134.

Cushman, Allerton S.
A New Method of Testing Galvanized Coatings, 411.
Discussion, 425.

D

Davis, M. P.
Discussion, 29.
Devries, R. P.
Discussion, 29.
Douty, D. E.
Discussion, 359.

E

Elmendorf, A.
The Uses and Properties of Water-resistant Plywood, 324.

F

Finn, A. N.
Discussion, 425.
Francke, W. J.
An Apparatus for Delicate Flexure Tests and Some Results of Such Tests, 372.
Discussion, 389.

G

Gage, R. B.
Discussion, 322.
Gardner, H. A.
Discussion, 437.
Gardner, Harry.
Discussion, 207.
Gibson, W. A.
Fatigue and Impact Fatigue Tests of Aluminum Alloys, 115.
Discussion, 135.
Giesecke, F. E.
Effect of Rodding Concrete, 219.
Discussion, 231.
Goldbeck, A. T.
Discussion, 261.
Goldmark, Henry.
Discussion, 102.
Green, H.
Further Development of the Plastometer and its Practical Application to Research and Routine Problems, 451.
Discussion, 484, 491.
Groesbeck, E. C.
A Note on Stresses Caused by Cold-Rolling, 31.

H

Hall, C. H.
Discussion, 436.
Hallett, R. L.
An Instrument for Measuring the Hiding Power of Paints, 426.
Discussion, 436, 437, 439.

Hart, L. H.
Discussion, 209.
Herschel, W. H.
Discussion, 483.
Howard, J. E.
On the Shattered Zones in Certain Steel Rails, with Notes on the Interior Origin of Transverse Fissures, 44.
Discussion, 68.
Howe, H. M.
A Note on Stresses Caused by Cold-Rolling, 31.
Discussion, 42.
Hubbard, Prévost.
Discussion, 313, 321.
Hutchinson, G. W.
Discussion, 207, 208.

J

Jackson, F. H.
The Standard Deval Abrasion Test for Rock, 278.
Job, Robert.
Discussion, 65.
Jones, J. L.
A New Method for Calibrating Brinell Hardness Testing Machines, 392.

L

Libberton, J. H.
Discussion, 277.
Lutts, C. G.
Chain Cable and Some of its Physical Properties, 80.

M

Marshall, C. H.
Improved Elastic Limit Recorder, 361.
A New Method for Calibrating Brinell Hardness Testing Machines, 392.
Mattimore, H. S.
Impact Test on Concrete to Regulate Coarse and Fine Aggregate Qualities and Mixes for Highways, 266.
Discussion, 277.
McAdam, D. J.
A High-Speed Alternating Torsion Testing Machine, 366.
Mercia, P. D.
Discussion, 133.
Moore, H. F.
Discussion, 371, 387.

O

Olsen, T. Y.
Ductility Testing Machines, 398.
A New Type of Automatic Cement Tester, 408.

P

Peaslee, W. D. A.
Testing of Porosity of Electric Porcelain, 495.
Pfund, A. H.
A New Colorimeter for White Pigments and Some Results Obtained by Its Use, 440.
Discussion, 438, 449.
Price, W. B.
Discussion, 404.

R

Rawdon, H. S.
Discussion, 61.
Rood, F. H.
Discussion, 291.

S

Sargent, G. W.
Molybdenum as an Alloying Element in Structural Steels, 5.
Discussion, 29, 30.
Schwartz, H. A.
Effect of Machining and of Cross-Section on the Tensile Properties of Malleable Cast Iron, 70.
Scoffield, H. H.
Discussion, 291.
Slater, W. A.
Discussion, 258, 261.
Smith, F. P.
Discussion, 312, 320, 322.

T

Talbot, A. N.
Discussion, 206, 231, 262, 277.
Taylor, D. G.
The So-Called Asphalt Content of Road Oils, 314.
Templin, R. L.
Discussion, 41.
Thackray, G. E.
Discussion, 425.
Thompson, G. W.
Discussion, 449, 488.

U

Upham, C. M.
Discussion, 204, 208.

V

Veitch, F. P.
Discussion, 437, 449.

W

Walcott, W. D.
The Volume-Moisture Relation in Sand and a Method of Determining Surface Area Based Thereon, 137.
Walker, Stanton.
Discussion, 250.
Webster, W. Reuben.
Discussion, 40.
White, J. A.
Discussion, 30.
Wickhorst, M. H.
Discussion, 67.
Williams, G. M.
Some Determinations of the Stress-Deformation Relations for Concretes under Repeated and Continuous Loadings, 233.
Discussion, 262.
Wilson, R. E.
Discussion, 493.
Woodward, R. W.
Discussion, 30, 38.

Y

Young, R. B.
The Volume-Moisture Relation in Sand and a Method of Determining Surface Area Based Thereon, 137.
